1 quarterly edition: \$3,500
2 quarterly editions: \$3,300
4 quarterly editions: \$3,000

Consolidate your Cbus Super accounts
Did you know we regularly search out duplicate member accounts?

There may be several reasons why a member has more than one Cbus Super account. However, like having multiple accounts with different super funds, having two accounts with Cbus, means members could be paying more fees than they need to be. To help our members, Cbus Super undertakes a monthly process to identify members who have duplicate accounts (such as two Cbus Industry Super accounts). Cbus identified, we undertake steps to verify if the duplicate accounts should be merged.

Key assessment criteria include:

- what, if any, insurance the member has;
- the most recent contributions received into their account;
- the member's investment choices; and
- any beneficiary nominations.

We'll notify the member once their accounts have been merged and let them know of any insurance premiums or administration fees that may have been refunded to their accounts.

If you or your employee notices that they have two Cbus Super accounts, they can also contact us on 1300 363 784 (toll free AEST, Monday to Friday) or by email at cbusmerge@cbusuper.com.au to request their accounts to be merged.

This information is about Cbus Super. It doesn't account for your specific needs. Please consider your financial position, objectives and requirements before making financial decisions. Read the relevant Product Disclosure Statement (PDS) and Super Member Statement of Advice (SMA) before you invest. Call 1300 363 784 for more information or visit www.cbustsuper.com.au. This information is for general information only and does not constitute an offer of insurance or any other financial product. It is not intended to be relied upon as a basis for any investment decision. Go mobile for efficiency

Pricing:
1 quarterly edition: \$5,900
2 quarterly editions: \$5,500
4 quarterly editions: \$5,200

Encourage rainwater harvesting
As sustainability takes centre stage, more homeowners are turning to rainwater harvesting to reduce water use. Dover has been a leader in this field since the early 2000s, pioneering systems like the Australian-made Rainlink range, which are highly efficient and locally manufactured.

Reduce Water Dependence
Rainwater harvesting systems collect rain in a tank or cistern for use in the garden, green irrigation and laundry. The rainwater is filtered through a mesh screen to remove leaves and debris, then passes through a sediment filter and a carbon filter to remove any remaining impurities and odours. This provides clean, safe water for use in the garden, green irrigation and laundry.

Long Term Savings
Rainwater harvesting systems can save up to 50% on water bills. They also provide a reliable source of water for use in the garden, green irrigation and laundry, reducing the need for expensive bottled water.

Easy Installation and Low Maintenance
Rainwater harvesting systems are easy to install and maintain. They can be installed on a roof or in a garden, and they can be connected to an existing water system or used as a standalone system. They also require very little maintenance, with only occasional cleaning of the filter and tank required.

Advanced Technology
Rainwater harvesting systems use advanced technology to ensure that the water is clean and safe for use. They include UV sterilisation and ozone treatment to kill any bacteria or viruses that may be present in the water.

Security and Property Value
Rainwater harvesting systems can provide a secure source of water for use in the garden, green irrigation and laundry. They can also increase the value of a property by providing a sustainable and eco-friendly water source.
